MAKE THE RIGHT TABLET CHOICE

Join Toughpad in the European productivity revolution

Recent research from Dynamic Markets indicates that tablet use is driving a commercial revolution across Europe, with 70% of employers reporting substantial productivity improvements from employees using tablets.

However, 86% of tablet purchasers are still encountering problems. And when you look at the causes, the case for Toughpad becomes clear.

BATTERY LIFE TOO SHORT

TOUGHPAD 4K

THE WORLD'S FIRST 20" 4K TABLET – AVAILABLE IN STANDARD AND PERFORMANCE MODELS

THROUGH ITS TOUGHPAD RANGE OF TABLETS, PANASONIC CAN PROVIDE THE ANSWERS TO ALL OF THE QUESTIONS YOU SHOULD CONSIDER WHEN CHOOSING A TABLET FOR YOUR BUSINESS.

Do you need a tablet that's productive outdoors?

Many conventional tablets have high-gloss, high-reflection screens that make working in daylight a practical impossibility. And if you need to work outdoors, you need to know whether your tablet has the screen resolution and viewing angle to make it capable of viewing or sharing detailed graphical information.

Does your business work in challenging conditions?

If you need your field teams to perform where things can get tough – in extremes of temperature, in dusty conditions or where their tools are likely to get dropped or wet – then many tablets just aren't up to the job. Equally, if drops, knocks and spills are a feature of everyday working life, something more durable than a conventional tablet is needed.

Do your teams need devices that can operate in vehicles?

If your mobile teams spend time behind the wheel, they need tablets that can stay productive with them. So if the tablet can't be mounted, powered and connected – safely and securely – inside their vehicles, then it probably isn't the right option for you.

Are device and data security important to you?

Many tablets can't compete with mobile or desktop PCs when it comes to security – of both data and the software loaded onto them. So if you don't choose tablets with corporate security features, it can lead to major risks in terms of your business operations.

Is staying connected critical to your operations?

Many tablets just don't have the capacity to connect to diagnostic technology, professional devices and other field-based assets. So a careful consideration of configuration ports and connectivity options should always be high on your list of priorities.

Screen visibility

The first fully rugged device to use the latest IPS α technology, the Toughpad FZ-G1 provides new levels of viewing quality for tablet users working outdoors. Offering extra-wide viewing angles, strengthened glass, high contrast ratio and high brightness, paired with a Panasonic anti-reflection layer, the 10.1" screen is purpose-built to perform in any weather or light conditions.

Reliability and durability

The Toughpad family is designed to meet the same incredible durability standards as Panasonic's Toughbook laptop product line. The Toughpad FZ-E1 and FZ-X1, for example, have a MIL-STD-810G rating for 3m drops, as well as an IP68 ingress protection rating for resistance to dust and water. The device is also rated for use in extreme temperatures from -29°C to +60°C.

Vehicle mounting

Toughpad tablets are supported by specialised vehicle mounts that allow the devices to stay connected to power and applications while on the move. To help field workers stay in touch with the office, the FZ-G1 also comes with an external antenna connector to allow vehicle-mounted devices to connect to a roof antenna.

Security

All Toughpad products include unique features dedicated to security, providing a high level of tamper and trusted boot protection.

Connectivity

Using its flexible ports, the FZ-G1 and FZ-M1 can be configured exactly for specific requirements, offering integrated USB 2.0, micro SD and serial ports, LAN connector, with GPS and integrated smartcard reader (optional). USB 3.0, Bluetooth 4.0 and WLAN AC capabilities are standard.

Mobility

All tablets claim to offer the advantage of mobility. Few can rival Toughpad. At just 540g and 18mm thick, the Toughpad FZ-M1 is the lightest and thinnest fully rugged 7" Windows 8.1 Pro tablet, putting powerful performance in your pocket.

Voice capability

Both the Toughpad FZ-E1 and FZ-X1 feature voice capability, with three microphones for intelligent noise cancellation and twin loud-volume speakers ensuring excellent clarity, even in noisy outdoor environments.

Ease of use

The fully rugged Toughpad tablets feature toughened capacitive multi-touch screens, which can be operated whilst wearing gloves.

Extended battery performance

Long battery life and hot-swap options mean Toughpad tablets stay operational as long as 14 hours, with the 5" Toughpad FZ-E1 and FZ-X1 capable of 1,000 hours' battery life in standby mode.

Panasonic recommends Windows.

TAKE YOUR TOUGHPAD ON THE ROAD

Thanks to our range of custom vehicle docking solutions, your field staff can work as efficiently on the road as they would in the office. Providing easy access to the devices and applications directly from the dock, they're the safe and secure way to stay productive at all times.

- Reduced set up time for every job, just mount and go
- Improved access to devices and applications in the field
- Optimised 3G/4G and GPS connectivity, ensuring faster data transfer
- Enhanced WLAN signal so you are always connected to HQ
- Peace of mind that your device is secure and compliant with safety legislation

SPECIALIST ACCESSORIES FOR SPECIALIST TASKS

Vehicle docks aren't the only accessories available for the Toughpad range. You can also opt for X-straps for easier one-handed use, port replicator for constant connectivity, and styluses and touch pens for more intuitive input.

AWARD-WINNING RECOGNITION AROUND EUROPE

Toughpad is proving to be a regular award-winner from industry reviewers across Europe. Here are just a few of the recent highlights.
